LEADERS MANAGERS SUPERVISORS

TechCIOB

Mentoring

What Is It?

Technical Membership (TechCIOB) recognises professionals with specialist technical expertise in construction who may struggle to gain recognition for their competence and experience. This credential gives you the right to add TechCIOB after your name, which employers and organisations worldwide respect. This empowers specialists to promote their achievements via a globally recognised certification and post-nominals. This membership grade is designed to recognise and support individuals who excel in specific technical roles.

Who Is Eligible?

To be eligible candidates must have a level 4 or 5 qualification (for example, NVQ4, BTEC), or Level 6 Diploma in Fire Safety and 3 years of experience working in a technical role; or a level 3 qualification and 5 years of experience.

Typical roles include CAD Designer, Site Supervisor, Retrofit Co-ordinator, Repairs Officer and Fire Risk Assessor.

Note: Other Level 6 qualifications may be eligible for the MCIOB route.

Who Will Be Mentoring Me?

TechCIOB candidates will be allocated one of our in-house team of experienced membership mentors and assessors.

How Is It Delivered?

TechCIOB candidates are assisted via video conference (Teams) tutorials.

What Is Involved?

Technical Membership involves a written submission where you'll demonstrate skills and knowledge across these key areas, providing examples that show your experience:

- » Technology
- » Sustainability
- » Legislation and Commercial Knowledge
- » Site Supervision and Management
- » Health, Safety, and Wellbeing
- » Ethics and Professionalism

For each area, you'll provide examples that show how your experience meets our standards.

What Happens After the Course?

A TLMS accredited assessor will assess the application and make a recommendation to CIOB, when the required standard has been met. The assessment process takes around 6 weeks.
